EXCELLENCE IN AGRICULTURAL MACHINERY

**Agitators**

## Technical Data

Model	HP requirement	RPM	Pipework	Top fill	PTO
5000	80	540	5"	Yes	T60
6000	105	540	6"	Yes	T80
7000	145	1000	6" (Bigger impellor housing)	Yes	V90

The Conor Megamix slurry pump is the strongest and most powerful slurry pump on the market. It is very user friendly with minimal maintenance requirements and is extremely efficient. It is fully hydraulic and there is no need to disconnect the PTO when travelling between tanks. Its unique stem design allows you to connect to the top fill very easily and this feature comes as standard.

### Features:

- User friendly – No need to disconnect PTO shaft even when travelling from tank to tank.
- Ultra efficient in design – Does the job quicker using less fuel.
- Unique pump flow design ensures unrivalled mixing power.
- Totally hydraulic machine, height and angle controlled with hydraulic rams.
- Hydraulic rams are mounted above floor level (ie. Out of the slurry tank) to avoid corrosion.
- Strongest most robust design on the market.
- Minimal maintenance requirements.
- Polypropylene slide plates in the main frame ensure smooth sliding movement in frame.
- No top link required.
- Unique stem design means by simply rotating the mixing nozzle into position you can use the pump to transfer slurry out of the storage pit/tank.
- Model 7000 comes with heavy duty V90 shaft.
- Option of 1000 RPM gearbox is available on model 6000.
- All models are available in 6'6", 7' 6", 8', 9' depth and as a static pump.

Powerful mixing

Poly side plates

Large propeller with straw chopper

Powerful mixing

Unique easy to use top fill design

Megamix 7000

Heavy duty robust construction

Strong platform
