Innovation, foresight and
passion since 1972

Dallas Keith offers an innovative and comprehensive range of feed, liquid feed, feed and mineral blocks that have benefited the supplement side of the animal feed industry for the past half century.

By being at the forefront in developing and expanding the supplementation of the animal feed world, we are proud to say our farmers and their livestock come first and continue to do so.

Over the past 50 years Dallas Keith has been responsible for introducing many unique products such as:

- AdMag - magnesium for addition to the drinking water
- Eco Packaging - biodegradable packaging
- ProVitLic 64 & 120 - Concentrated urea liquids
- Molassed mineral blocks in plastic buckets
- Feed blocks in plastic buckets
- Manufacturing blocks in larger sizes than standard - 20kg, 100kg & 500kg
- Natural alternatives to chemical treatments of internal and external parasites
- Original method of producing poured salt blocks

Dallas Keith is a family-owned and run business which has been operating for 50 years

Founded in 1972 by Bernard Willett whose particular interest in the supplementation side of the animal feed industry led him to start one of the first companies involved in the development of a comprehensive range of feed, liquid feeds and mineral blocks.

Bernard's son and grandchildren continue to share the same value as their father and grandfather in producing the highest quality products to ensure that both farmer and livestock's needs are met.

Thanks to Bernard's innovation, foresight and passion in the industry we continue to manufacture a wide range of mineral supplements for all classes of stock.

They continue to understand the importance of mineral, trace element and vitamin supplementation and the vital role each plays in ensuring livestock are performing to the best of their ability.

The recipe for health and productivity

Providing Dallas Keith products to your stock can help:

- Meet the energy requirements for flushing, pre tugging & lambing for best results, overall vitality & health
 - Increase conception rates thanks to vital nutrients
 - Produce stronger, healthier animals at birth
 - Reduce labour & cost
 - Give 24-hour access, even for shy feeders
 - Balance variations in roughage quality through improved utilisation of forage
 - Ensure optimum condition, target growth weights & lactation
 - Boost health, immunity & fertility with essential vitamins, minerals & trace elements

Hi-Energy Feed Blocks

This specially formulated range of Hi Energy Feed Blocks are based on a molassed protein and high energy formulation, with the inclusion of a full range of minerals, vitamins and trace elements.

Dallas Keith have struck a balance between making blocks hard enough to stand up to the worst weather, while still giving your stock ready access to a molassed, cereal based formulation with the inclusion of soya.

Hi-Energy Feed Blocks

Hi Energy

Good energy level and high protein for growth and condition of all classes of stock. Aids lactation. To be offered where energy is a requirement (poor pasture/ forage)

Hi Mag Energy

Specifically formulated for stock on lush pasture where grass staggers may be a problem. Spring/Autumn especially

Cattle Protein

General purpose block for all types of housed or grazing cattle

Protein Energy

General purpose feed bucket for cattle and sheep providing protein and energy for growth and maintenance

The Lambing Bucket

Formulated to meet the increased nutritional need of the ewe in late pregnancy. Molasses and fats to assist in the prevention of twin lamb disease

Dry Stock

High levels of magnesium to help prevent milk fever post calving

Deccox

To prevent coccidiosis in lambs and calves

Suckler Cow

Good levels of energy and protein to ensure good lactation and cow condition

Calf Breather

Blend of menthol, eucalyptus & oregano to alleviate stress and respiratory problems that commonly occur in calves

Pre Tup

Ewes need to be on a rising plane of nutrition to ensure the maximum number of eggs for fertilisation. Sept/Oct/Nov time when tups are introduced – your only chance for high lamb numbers

Molamin Mineral Blocks

The Molamins Mineral range contain high levels of both the major and trace elements in amounts equivalent to many free access mineral powders.

They encourage good feed conversion rates, general health and well-being.

Molamins are unaffected by weather conditions which makes them ideal for use with both grazing and housed stock.

Molamin Mineral Blocks

Cattle

A high specification general purpose mineral block for all types of housed or grazing cattle

Hi Mag

A high specification mineral block with added magnesium to guard against grass staggers and milk fever

Copper Rich

Copper is essential for energy and metabolism ensuring healthy growth & a healthy digestive system. Additional copper is sometimes required

Zinco

Protected levels of zinc, selenium and higher levels of Vitamin E. Essential for growth and fertility rates. Also improved hide and hoof condition

Cattle Fertility

Formulated to increase bulling activity and higher conception rates

Sheep

A high specification general purpose mineral lick for housed or grazing sheep

Hi-Phos

To be fed at bulling time – phosphorous is needed in rapidly growing calves and lactating cattle. It is essential for tissue and bone growth

Dry Cow

Specially formulated for cows prior to calving. Guards against milk fever by supplying magnesium, phosphorous with minimal levels of calcium

Garlyx

Contains high levels of garlic and other natural ingredients to deter biting flies and insects

Youngstock

Specifically developed to meet today's high genetic expectations. Young stock reared to achieve optimum weights for early insemination and calving

BioMins Organic

BioMins is a specially formulated range approved by the Soil Association for use in organic farming systems.

This range is based on organic cane molasses with natural proteins along with the inclusion of a full spectrum of trace elements and minerals that are essential to the health and production of your livestock.

BioMins Organic

BioMins Organic Feed & Mineral Blocks

BioMins Feed Block

An organic high energy general purpose feed bucket suitable for all types of stock

BioMins Cattle

General purpose organic mineral lick for all types of housed or grazing cattle

BioMins Garlyx

A high specification organic mineral block with added high levels of garlic and other natural ingredients to deter biting flies and insects

BioMins Sheep

General purpose organic mineral lick suitable for housed or grazing sheep

BioMins Hi Mag

A high specification organic mineral block with added magnesium to guard against grass staggers and milk fever

BioMins Dry Cow

Specifically formulated for organic cattle prior to calving. Guards against milk fever by supplying magnesium, phosphorous with minimal levels of calcium

BioMins Organic Liquid Molasses

BioMol

Organic molassed liquid feed suitable for feeding 'ad-lib' through wheel lick feeders, poured over forage or added to mixers to reduce dust and increase palatability

BioMil Hi Mag

Organic molasses liquid feed with high levels of magnesium to guard against grass staggers and milk fever

SaltLix

Dallas Keith is the only company to offer a guaranteed high specification salt lick in a bucket with a full spectrum of trace elements, no waste and economical intake levels.

The SaltLix range is designed to provide mineral and trace element supplementation for both housed and grazing animals on all management systems.

SaltLix

SaltLix is also approved by the Soil Association for use in organic farming systems.

SaltLix Cattle

High trace element salt block with additional copper which is essential for optimum growth rates and general thrift in cattle

SaltLix Sheep

High trace element salt block to suit all classes of sheep. Inclusive of all the minerals and trace elements essential to general sheep health and well being.

SaltLix Garlic

Helps to repel biting insects as well as having a good antiviral action. Garlic has been known for clearing up some of the most difficult to treat conditions. Improves appetite, digestive functions and the immune system to naturally fight infections

SaltLix Hi Zinc

Aids maintenance of healthy feet and stops contagious skin complaints.
Best results have been seen in beef cattle on high cereal diets and sheep on wet ground

SaltLix Iodine

Essential for healthy thyroid function which increases growth, milk production, fertility and calf vitality

Molassed Liquid Feed

One of the first companies involved in the development and production of liquid feed supplements for ruminants, we now offer probably the widest range of formulations available in the U.K.

We have formulations which can be poured over hay, straw, maize silage or fed ad-lib through wheel feeders.

Molassed liquid feed is an easy way of increasing dry matter intake whilst adding energy, protein, palatability and mineral supplements to a ration.

Molassed Liquid Feed

Urea Based Liquid Molasses

Urea helps to break down the cellulose wall of roughage making it more digestible.

The molasses provides high energy (M.E.) as well as increasing palatability

ProVitLic 16

For all classes of sheep. High level of energy and optimum level of protein with added CAV

ProVitLic 20

For cattle on grass or silage and all classes of sheep, especially where hay and poor quality silage are a major part of the ration

ProVitLic 40 + CAV

Used to supplement youngstock and stores on straw based rations. Also suitable for cattle on maize silage to increase protein levels in the ration

ProVitLic 64

Dilute 2:1 in water or pour over forage or added to mixes to increase protein. Not for ad-lib feeding

Suckler Cow

Extra protein to improve digestion of poor quality roughage with the addition of magnesium to aid in the prevention of grass staggers and improve muscle tone for easier calving

Dry Cow

Contains magnesium and protein to help prevent milk fever and improve roughage digestion

Molassed Liquid Feed

Magnesium Liquid Molasses

A convenient way of providing magnesium in a palatable molasses base. Magnesium is essential for maintaining the body's natural balance and also helps to prevent milk fever and grass staggers

MagVitLlc

Mag supplementation for all classes of stock with the addition of cider apple vinegar.

Specialist Liquid Molasses

Our specialist blends of molasses with different additives for specific animal needs. Tailor made for your stock's requirements

VitMol

Cane molasses with high levels of vitamins and trace elements for improving palatability of feeds

Econolic

GM and urea free, general purpose high-energy liquid for all classes of grazed or housed stock

MiniMol

General purpose energy liquid. Used to reduce dust and improve palatability of home mixes. Does not contain urea

Please get in touch with us for any specific requirements

Water Soluble Minerals

We have formulations which can be added to the drinking water to balance any identified on farm deficiencies and can also be tailor made to your stock's specific requirements.

AdTrace is a time saving, cost effective system for adding trace elements, vitamins and minerals to drinking water.

All of these products may be used with mechanical proportioners.

Water Soluble Minerals

Animals must be kept away from natural water sources i.e. streams and rivers to ensure correct dosage of AdTrace

AdMag 5%

The most efficient way of ensuring magnesium supplementation to your herd or flock as all animals drink.

AdMag 5% contains the full range of major trace elements with the inclusion of 5% magnesium to help prevent milk fever and grass staggers

AdMag 7.2%

The most efficient way of ensuring magnesium supplementation to your herd or flock as all animals drink.

AdMag 7.2% contains the full range of major trace elements with the inclusion of 7.2% magnesium to help prevent milk fever and grass staggers

AdTrace

Particularly proven in grass based dairy systems to balance any identified on farm deficiencies and can be made to ensure to your specific stock's requirements

Equine Flexi with Garlic

NOT FOR USE IN CATTLE OR OTHER RUMINANTS

DK DALLAS KEITH

Equine Flexi Range

Dallas Keith's 12.5 kg Equine Flexi Range contains a full spectrum of all the vital minerals and vitamins along with oil, protected trace elements and protein for a sound nutritional platform.

They are supplied in a safe, flexible and shatter-proof container, formulated to ensure that your horses thrive whether stabled or in work.

The entire range is BETA NOPS certified

Our unique formula ensures sound muscle and bone development, enhances coat and foot condition whilst improving health and temperament.

The Dallas Keith Equine Flexi Range has been formulated to ensure that your horses thrive whether stabled or in work and is also suitable for foals, lactating mares.

Equine Flexi Range

Essential

Enriched with a full spectrum of vital vitamins and minerals as well as a little extra protein. Designed to complement all diets

Digestion

Formulated with yeast to aid digestion in the hind gut to maximise forage utilisation whilst maintaining condition. Designed to be offered when forage quality is poor

Garlic

Enriched with garlic to repel biting insects. Can be used all year round. Best results in Spring/Summer months

Herb

A blend of essential herbs for growth, health and maintenance. Vital for ensuring the immune system is in ultimate working order

Menthol

The addition of menthol and eucalyptus to aid respiratory issues or discomfort

Turmeric

A natural anti-inflammatory to support suppleness and freedom of movement

Hoof & Hide

A blend of biotin and zinc specially formulated for improved hoof and coat condition

DK
EQUINE HEALTH

Equine Flexi Menthol

For The Best Out Of Your Horse

UFA5

INDICATIONS:
• For relief of heat, pain and inflammation associated with:
• Muscle strains and sprains
• Joint pain and inflammation
• Laminitis
• Hoof pain
• Burns and sunburn
• Insect bites and stings
• Itchy skin
• Allergies
• Colic
• Stomach pain
• Diarrhoea
• Constipation
• Coughs and colds
• Fever
• Anxiety
• Stress
• General discomfort

HOW TO USE:
• Apply a small amount to the affected area.
• Rub in gently with your fingers.
• Repeat as often as necessary.

CAUTION:
• Do not use on horses with known hypersensitivity to menthol.
• Do not use on horses with open wounds or cuts.
• Do not use on horses with severe respiratory distress.

KEEP OUT OF REACH OF CHILDREN.

NET WEIGHT: 100g (3.5oz)

EXP. DATE: 12/2024

LOT NO: 123456789

MANUFACTURED BY: DK EQUINE HEALTH

100% NATURAL ESSENTIAL OILS

100% VEGAN

100% CRUELTY FREE

100% ECO FRIENDLY

100% SAFE FOR YOUR HORSE

Deer Range

Many deer graze in parkland, forest, on heath or hill. In general, the nutritional quality of such food stuffs is poor, the soil acidic and often is lacking in the vital trace elements and minerals deer need to thrive.

Dallas Keith have developed a unique range of feed blocks and liquid feed to ensure farmed and wild deer alike have access to all of the minerals and trace elements that are lacking in their modern day diet.

Deer Range

Mineral deficiencies in deer can cause:

Weight loss

Nervousness resulting in handling difficulties

Reduced calf retention

More susceptible to disease

Deer Hi Energy Feed Block

General purpose feed block for all types of farmed and wild deer with the essential trace elements and minerals and extra energy.

Best offered in winter months.

Deer Mineral Block

General purpose mineral block to supplement grazing deficiencies.

Deer SaltLix

High trace elements with high levels of copper in a salt block. Best offered in summer months.

Deer Liquid Molasses

A general purpose molassed liquid feed with all of the essential trace elements and minerals to keep the minerals and vitamins up in deer wild or farmed

The Pecking Block

The Pecking Block is a 10kg nutritious wheat, sunflower and maize block with additional oyster shell to enhance egg shell quality.

As well as providing your birds with vital protein, fibre, vitamins and minerals The Pecking Block enriches the bird's environment.

This provides an area of interest for your flock to help prevent feather pecking and boredom whilst also providing the weaker birds the food they may have missed out on. This helps to ensure complete flock health and this helps to keep beaks from becoming too sharp.

Available with Oregano which has been shown to support gut health and firmer droppings.

Other Ranges

Goats

Hi Energy Goat Feed Block

A highly palatable general purpose Hi Energy feed block for all classes of goat. Formulated to enhance a goat's diet, containing all of the essential vitamins and minerals needed to meet a goat's nutritional requirements that are lacking in modern pastures. Added protein helps support muscle growth in kids and milk production in lactating does.

Alpacas

Hi Energy Alpaca Block

A highly palatable general purpose Hi Energy feed block for alpacas. Formulated to enhance the alpaca's diet, containing all of the essential vitamins and minerals needed to meet their nutritional requirements.

Cider Apple Vinegar

Our Cider Apple Vinegar is made solely from whole British apples which are turned into vinegar, when acetic bacteria converts the alcohol to acetic acid – a substance essential to cattle and many other animals.

Thousands of farmers swear by cider apple vinegar and use it for a variety of reasons.

Suitable for all types of stock, fowl and horses.

An organic, Soil Association Cider Apple Vinegar is also available.

Eco Packaging

Empty plastic buckets cause an eyesore and in large quantities are difficult to dispose of.

To solve this problem, we offer our entire product range in bio-degradable and edible cardboard packaging.

Available in 20kg, 250kg & 500kg

Equipment & Block Sizes

20kg

100kg

500kg

250 litre wheel feeder
