THE ALL NEW ‘ CRUSH

FETF Grant Eligible items

Find out more about the
NEW Crush here

CATTLE CRUSHES

FETF Grant Eligible items Only

All Crushes have a rubber floor for the grant

Hydraulic Crush FETF60

The Bateman Hydraulic crush is the true beast of the Bateman range, with fully automated controls offering the user complete control and saving endless time and energy.

Some key features:

- Vet cage
- Rear sliding gate
- Hydraulic squeeze, yoke and chin lift operation

To find out more, scan the QR Code

Ambassador Squeeze FETF61

The Ambassador squeeze crush has been our best-selling crush ever since it was released in 2013. Offering a unique squeeze mechanism.

Some key features:

- Chin scoop compatible
- Unique "always locked" squeeze mechanism
- Manually operated head yoke
- Rear Sliding Door and TB Doors
- Good for all breeds including horned animals

To find out more, scan the QR Code

Tamar Squeeze FETF61

The Tamar squeeze crush is an adaptation of what was already a hugely innovative design from Bateman, offering a unique semi-automatic yoke system to be used as either manual or automatic.

Some key features:

- Manual pump hydraulic chin scoop included
- Unique "always locked" squeeze mechanism
- Manually operated or automatic head yoke
- Rear sliding door and TB doors

To find out more, scan the QR Code

CATTLE CRUSHES

FETF Grant Eligible items Only

Devon Squeeze **FETF61**

The Devon squeeze crush is an adaptation of the Ambassador squeeze to feature an automatic yoke. Offering the same unique squeeze mechanism unrivalled by any other crush on the market

Some key features:

- Chin scoop compatible
- Unique “always locked” squeeze mechanism
- Automatic operating head yoke
- Rear sliding gate and TB door

To find out more, scan the QR Code

Ambassador Crush **FETF59**

The standard version of the Ambassador crush offers versatility and is a great general-purpose cattle crush. The Ambassador provides the user with premium quality strength and several safety features making this crush stand out in the market place.

Some key features:

- Good for horned cattle
- Manually operated yoke
- Foot trim package optional
- Full access to animal

To find out more, scan the QR Code

Devon Crush **FETF58**

The Devon crush is the first in the range to include an automatic head yoke. A great crush for those looking to work with less labour.

Some key features:

- Chin scoop compatible
- Foot trim compatible
- Automatic head yoke
- Full access to animal
- Anti-slip bars

To find out more, scan the QR Code

CATTLE CRUSHES

FETF Grant Eligible items Only

Longhorn Crush

FETF327CA

This crush of unique design is capable of handling cattle of varying sizes from approximately 300kg to 1500kg. The yoke mechanism is manually closed in from the sides of the crush to restrain the animals neck.

Some key features:

- Yoke with adjustment
- Tapered access doors
- Chin scoop access panel
- Scissor Yoke

To find out more, scan the QR Code

Cattle Handling Trailer FETF56

The Trailer crush is designed with all the features from the Tamar crush or Ambassador Crush. The Trailer comes complete with cattle hurdles to make a corral pen. It also has a fold away lighting board to operate brake, indicator and hazard lights.

Some key features:

- Weigh tray with optional load bar
- Hydraulic chin scoop included
- Unique "always locked" squeeze mechanism
- Manually operated or automatic head yoke

To find out more, scan the QR Code

Chin Scoop

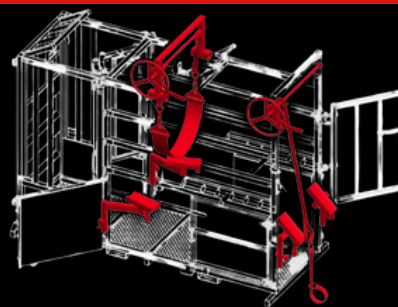

FETF62

To find out more, scan the QR Code

The chin scoop is the ideal tool for keeping an animal's head up for such tasks as bolus delivery. The Bateman scoop can be set up to be operated from either side of the crush and is a simple bolt on construction.

Foot Trimming Package FETF63

To find out more, scan the QR Code

Our foot trim package is an optional extra for three of our standard range crushes including the Hybrid, Ambassador standard and Devon standard.

CATTLE HANDLING

FETF Grant Eligible Items Only

Cattle System 1

FETF57

The Bateman standard system No. 1 for cattle offers a practical and heavy-duty solution for any space it will fit into. All sections are fabricated from our heavy-duty gates, forcing sections and race sections.

Some key features:

- Featuring two holding pens before the animals enter the clad forcing section
- The half circle forcing pen features non return fins

To find out more, scan the QR Code

Bespoke Cattle System

FETF57

We offer a free no obligation design service for all handling systems, we have an extensive back catalogue of successful systems that we can show you for guidance or start completely from fresh it is up to you. Animal and user safety is always at the forefront of our design, but needless to say these schemes vastly improve animal flow and reduce operating times.

OTHER CATTLE ITEMS

FETF Grant Eligible Items Only

Premium Dehorner FETF223A

The design of the new Bateman Premium Calf Dehorning Crate now incorporates several new features: It is manufactured from 40mm X 40mm box section and clad with 6mm thick polypropylene.

Some key features:

- The Belly Band is a unique design
- Back up bar included with 4 fixing points for different size animals
- Adjustable height bar for securing calf's head

To find out more, scan the QR Code

Badger Proof Feed Trough FETF96

Our hugely popular beef trough is simple but strong, with a trough depth of 230mm it gives great variation in the age of animal it can be used for. High enough off the ground to discourage any badger invasion.

To find out more, scan the QR Code

Calving Yoke Gate FETF65

The Bateman calving hurdle is a solid unit and an extremely useful product, fixing to a wall or post and folding round to the side of the animal. This hurdle also features removable side bars. The upper bars can be removed for caesareans and the lower bars when a calf is suckling.

Some key features:

- 3000mm long
- Ratchet locking points for the yoke
- Width adjustment on yoke

To find out more, scan the QR Code

SHEEP ITEMS

FETF Grant Eligible items

Find out grant guidelines
and funding amounts here

SHEEP HANDLING

FETF Grant Eligible Items Only

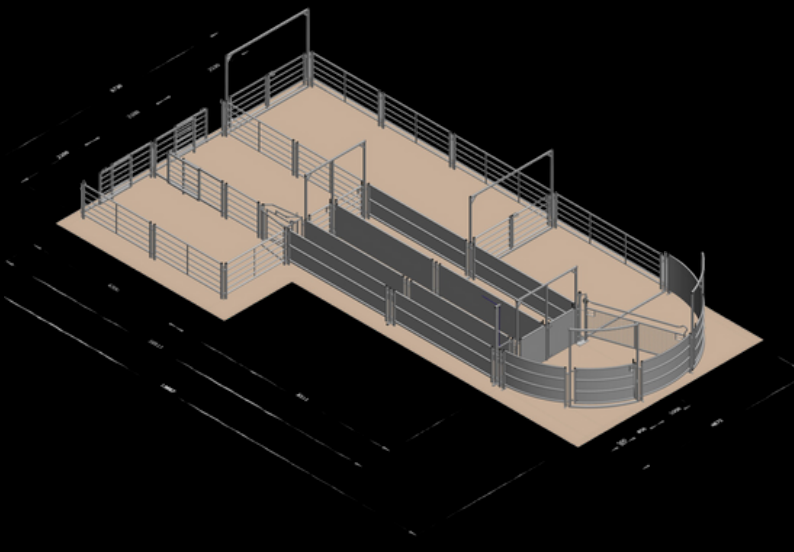

Sheep Trailer FETF69

The Sheep Handling Trailer is our solution to fast, efficient and mobile working. It can handle up to 250 sheep, and includes twenty seven 6ft hurdles with skids.

Some key features:

- Corrosion resistant polypropylene
- 2 way shedding gate
- Spring loaded drafting gates
- Easy clean chequer plate floor
- 4 way shedding

To find out more, scan the QR Code

Sheep System E FETF70

This system has the added advantage of two drafting pens and larger collecting pens.

Key features:

- Half circle forcing pen with two access gates
- 500mm/1000mm wide race with guillotine gate at entrance and shedding gate exit.
- Drafting pens

To find out more, scan the QR Code

Sheep Grip FETF71

The Bateman sheep grip unit is designed to be used for dagging, drenching, injecting and tagging varying sizes of sheep. A foot operated treadle operates the restraining panel which grips the sheep preventing its movement forwards and backwards.

Some key features:

- Adjustable width settings for varying size sheep
- Entry ramp with aluminium tread plate base and stop gate
- Trailered version available

To find out more, scan the QR Code

SHEEP HANDLING

FETF Grant Eligible Items Only

Bespoke Sheep System FETF70

We offer a free no obligation design service for all handling systems, we have an extensive back catalogue of successful systems that we can show you for guidance or start completely from fresh it is up to you. Animal and user safety is always at the forefront of our design, but needless to say these schemes vastly improve animal flow and reduce operating times.

To find out more, scan the QR Code

Draftweigh FETF75

The Draftweigh is our perfect solution for fast and easy working. It can weigh, read tags (optional extra) and manually draft all in one unit. The Draftweigh is also completely portable and easy to operate with both hands.

Key features:

- Fold under wheels for easy transportation / works flat to the ground
- Tapered sides

****Must be purchased with Eziweigh 7**

To find out more, scan the QR Code

Sheep Vet FETF241A

The Sheepvet is our unique turnover crate, with many features only seen in the Bateman version. It is perfect for foot pairing, dagging and general veterinary work.

Some key features:

- Automatic head yoke with width adjustment
- Squeeze down body clamp
- Cradle length adjustable
- Easy turning mechanism

OTHER ELIGIBLE ITEMS

FETF Grant Eligible Items Only

Sheeted Doors

FETF309SH/FETF310SH/ FETF311SH

Heavy duty sheeted doors are a special item, and such can be made in a variety of different lengths and sizes – please call with specification for a quote. We will advise before quoting if your door is too big (for health and safety reasons) and if it needs to be made in sections and bolted together on site.

All sheeted doors are supplied with bolt on top lifting brackets to allow safe lifting on and off our wagon for use on-site when lifting into place.

FETF309SH - Minimum Height 1200mm, Minimum Length 1200mm

FETF310SH- Minimum Height 1200mm, Minimum Length 2400mm

FETF311SH- Minimum Height 1200mm, Minimum Length 4200mm

To find out more, scan the QR Code

Standard Water Trough FETF304SH/CA

Great for larger pens and come complete with welded end service box.

To find out more, scan the QR Code

Sheep Water Trough FETF304SH

The sheep water trough is 250mm high, making it the perfect level for sheep.

**Needs service box and ball valve
